pe) The limit of quantification/determination had to be increased, because matrix effects required a change in the relation of sample amount and extractant.

Explanation: "<" or "n.q." represent the fact that the concentration of the analyte is below the limit of quantification (LOQ).

Explanation: OM = on original matter; DM = on dry matter base

Start of testing: 22.06.2017

End of testing: 28.06.2017

The analytical results are only valid for the delivered sample material. A plausibility check is hardly possible for samples of unknown origin. Duplication of this document or of parts of it requires the authorization from laboratory.
